GEMTEC UXO

Environmental & Geophysical Services

UNEXPLODED ORDNANCE SERVICES (UXO)

GEMTEC has expanded its business line to include UXO industry support. GEMTEC's engineers, scientists, and geophysicists can support any size UXO operation.

Our group has the technical expertise, and experience necessary to provide cost-effective solutions for the UXO industry.

UXO SUPPORT SERVICES PROVIDED

GEMTEC provides a full range of support services for UXO operations, including:

- Research and Development
- Soft Prove Out (SPO) Design and Construction
- UXO Avoidance
- Site Inspections and Assessments
- Site Characterization
- High Definition Data Surveys
- Intrusive Investigations
- Quality Control and Quality Assurance
- Site Safety Planning and SOP Development
- Work Plan Development

DETECTON METHODOLOGIES

GEMTEC's typical methodologies used to conduct UXO investigations include:

- GPS / GIS
- Ground Penetrating Radar (GPR)
- Time and Frequency Domain (EM)
- Magnetometry
