

Project Title: Phase I Environmental Site Assessments – Quebec, Ontario
Prince Edward Island, New Brunswick, Nova Scotia, Newfoundland

Client: Midland Transport

Project Description:

In January 2008, GEMTEC Limited carried out twenty-six environmental assessments on behalf of Midland Transport in Eastern Canada. Specific locations are shown in the following table:

| New Brunswick | Nova Scotia | Newfoundland |
|----------------------|---------------------|--------------|
| Moncton (4 sites) | Sydney | Grand Falls |
| Bathurst | Truro | St. John's |
| Edmundston | Kentville | Corner Brook |
| Fredericton | Dartmouth (2 sites) | |
| Saint John (5 sites) | | |
| Newcastle | | |

| Prince Edward Island | Quebec | Ontario |
|----------------------|-------------|-----------|
| Charlottetown | Montreal | Brampton |
| | Quebec City | Cambridge |

Phase I Environmental Site Assessments (ESAs) were carried out in all of the locations indicated in the table **within a 6-week period**. All Phase I ESAs work was carried out in conformance with the CSA Standard Z768-94, Environmental Site Assessment (ESA), and in compliance with our client's particular requirements. Most of these sites were carried out in light industrial and commercial areas. Many of these sites had long histories of industrial land use activities including petroleum storage.

Completion Date: February 2008

Project Deliverables & Notable Accomplishments:

Bilingual services were provided and the project was completed within the tight project timeline.
